

## DEPC-Treated Water (DNase/RNase Free)

### Introduction

DEPC treated water is commonly used for preparing 75% ethanol, RNase Free reagents and dissolving RNA.

### Formula

Formula: DEPC-Treated Water

Take ultrapure water, add 0.1% DEPC and stir for 2 hours, then divide into plastic bottles and place overnight. Sterilize under high temperature and high pressure.

### Ordering Information

CAT.No.	Product Name	Package
C453	DEPC-Treated Water, RNase-Free Water	500 ml

### Specifications

Application	Dissolve RNA
Packaging	Polypropylene plastic bottles
Component	DEPC-Treated Water
Volume	500 ml
DNase	No detected
RNase	No detected
Sterilization	Under high temperature and pressure (121°C, 20 minutes)
Storage conditions	Room temperature
Valid	To prevent microbial growth during use, it is best to store at 2-8°C. The product can be stable for 1 year under these conditions.
Impurity	Ultrapure water preparation
